EXP. No. 3

Create a bat in which to name a student and display enrollment number and marks scored in the three subjects.

(Working with variables)

Step 1:- Open UI Path studio then go to the Process option and pop out will come and name the process.

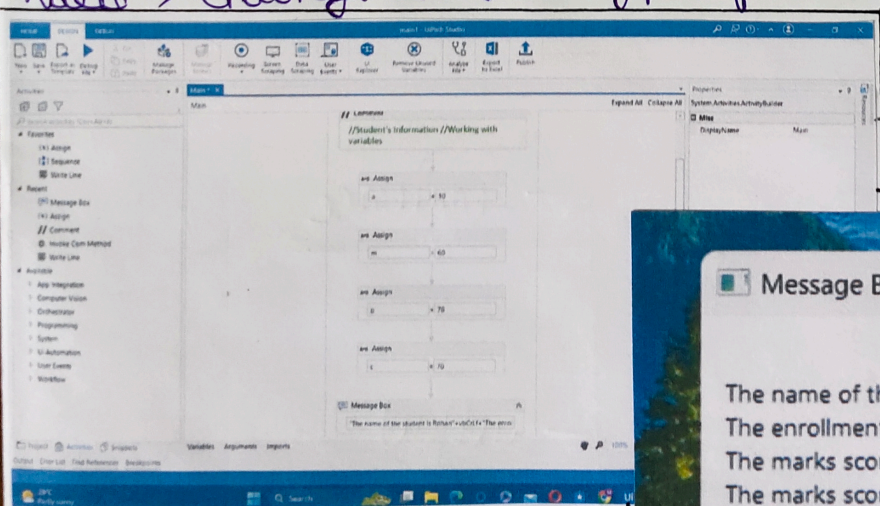

Step 2:- Assign the value to a variable 'a' using an assignment operator. Here, 'a' will represent the enrollment number.

Step 3:- Similarly assign a variable 'm' which represent the marks scored in maths.

Step 4:- Also assign value to 'p' and 'c' variable, which represents the marks scored in physics and C programming.

Step 5:- With the help of Message box display the required result by writing it in the message box.

Note → change the datatype of variables i.e. a, p, m, c to int.
